

X11 Dual Input Tablet Computer, An enterprise tablet tailored made for you!

Multi-Touch Screen

With multi-touch screen, your thoughts flow to the X11 intuitively through your fingertips.

Integrated GPU

Using the latest Intel mobile processor, X11 satisfies your graphic and video needs while staying energy efficient.

Pressure Sensitive

X11 captures the finer details of your creativity by accurately locating the pen and the level of pressure applied.

Pen Input

Hand writing is a natural and powerful way to communicate. You can write effortlessly on X11 as you would on paper.

Long Battery Life

10 hours continuous operation and 30 days standby battery life on a single full charge.

Instant On

X11 is so energy efficient that you can leave it on standby mode and turn it on instantly when you need it.

X11 So many features, yet so light and thin

Thin and Light

There are so many unique features on X11 that you will be surprised how we packed them into such a thin and light profile, with just ca. 900g weight and ca. 14mm thickness.

Alu-Magnesium Housing

Alu-Magnesium alloy back housing provides strong protection, the middle frame with auto industry coating surface delivers brilliant shining in dolphin grey.

Security Focused

X11 helps you protect your data built-in fingerprint scanner and the TPM data encryption module that are supported in Windows 7 Pro.

Front/Rear Cameras

X11's 2.0MP front camera is great for video conferencing while the 3.0MP/5.0MP rear camera adds more ways for you to exercise your creativity.

Stays connected

X11 helps you stay connected with both Wi-Fi, and 3G networking capabilities. With its dual high speed usb port, user can further enhance X11 networking capability with additional peripheral.

Hook them all up

With 2 usb ports, a mini HDMI port and hardware compatibility of Windows, you have limitless customization options to suit your needs with X11.

Windows 7 Professional

Windows 7 Professional offers user unsurpassed software compatibility and enterprise features like "Group Policy controls" and "Network Backup".

1080p play back

Utilizing the latest Intel mobile processor, X11 delivers smooth 1080P video decoding while staying energy efficient. X11 aims satisfy all your graphic demand from work and play.

Solid State Design

With advanced solid state design, X11 is less susceptible to physical shock, runs silent, and is more energy efficient than conventional laptop. X11 Lux sports a 128GB SSD, largest of any tablet computer on the market now.

Work and Play

X11's excellent built-in speakers are perfect for video conferencing, listening to music or watching movie.

Silence is golden

X11 operates in silence thanks to its advanced engineering design approach. It only makes sounds when you want it.

Light Sensor

X11 automatically adjusts screen brightness based on environmental light and is fully customizable to user preference.
